

# Jason Dinh

Full Stack Engineer

(940)600-0754 | DinhjDev@gmail.com | dinhjdev.github.io/v1/

---

## Summary

I studied **Computer Science at University of North Texas**, but decided that coding bootcamp would be a better option for me since I wanted more hands-on experience and to get into the job field sooner. I recently graduated from **CodingDojo**, where I studied the **Java Full Stack** and I'm looking to start my career in the industry.

---

## Technical Skills
